

The figure displays two trellis plots side-by-side, illustrating survival status across different patient IDs. The left plot is for 'Non-relapsed' patients, and the right plot is for 'Relapsed' patients. Both plots show 'survival' on the y-axis (Non-relapsed in blue, Relapsed in red) and 'patient_id' on the x-axis. The y-axis is labeled 'Inverse Simpson Index' and the x-axis is labeled 'patient_id'.

Left Plot (Non-relapsed):

- Y-axis: survival (Non-relapsed, Relapsed)
- X-axis: patient_id
- Legend: Non-relapsed (blue), Relapsed (red)
- Patients: P01, P02, P04, P05, P06, P07, P08, P14, P17

Right Plot (Relapsed):

- Y-axis: survival (Non-relapsed, Relapsed)
- X-axis: patient_id
- Legend: Non-relapsed (blue), Relapsed (red)
- Patients: P13, P15, P18, P19, P21, P22, P23, P24, P25, P27, P28, P29, P30, P31, P33
